C38.

Have any of the following been proposed to you by your electricity provider?

Rows (Order randomised)

1. Electricity generated by renewable energy sources (e.g. wind, solar, tidal, geothermal, or hydropower)
2. Different electricity rates for peak hours (e.g. early evening) versus off-peak hours (e.g. night-time)
3. Smart electricity meters that allow you to monitor your energy consumption
4. The option to self-generate electricity for your own use or to sell it back to the grid
5. A device that optimises energy use by automatically controlling your heating/cooling and appliances based on your desired settings

Columns

1. Yes and I have chosen this option
2. Yes, but I have not chosen this option
3. No, and I'm not interested
4. No, but I would be interested
8888888. Don´t know

Your answers on the previous question indicate that you do not always try to reduce energy consumption in your household. Please help us understand the most important reasons why not:

Please select all that apply.

1. I am willing to change my habits but I forget to do so
2. Environmental issues are important to me but it's too difficult to change my habits
3. I don't believe a serious environmental problem related to energy consumption exists4
4. Others in my household would not cooperate or I would receive criticism from those around me
5. I feel like my other environmental actions already make enough of a difference
7. My behaviour changes will not make a difference
8. I won't see any personal benefit from changing my behaviour
9. I don't know how to decrease my energy consumption further
10. I feel confident that technological innovations will solve environmental problems

C44.

Have you installed any of the following items over the past ten years in your current primary residence?

Rows: (randomised)

1. Highly energy-efficient appliances (e.g. washing machines, refrigerators)
2. Low-energy light bulbs (e.g. compact fluorescent, LED)
3. Energy-efficient windows (e.g. double or triple glazed windows)
4. Thermal insulation of walls/roof/floor
5. Thermostats
6. Solar panels for electricity
7. Solar water heating
8. Battery storage
9. Heat pumps (devices that use ambient ground and air temperature to provide heating/cooling via a compressor)
89. Other

Columns:

1. Yes
2. No
99. Don't know

Base: if C44=1, for all items selected in C44 code 1

C45.   government financial support

Has governmental financial support (e.g. grants, loans with below-market interest rates, tax exemption) encouraged you to install any of the following items in your residence?

Rows: (randomised)

1. Highly energy-efficient appliances (e.g. top-rated washing machines, refrigerators)

3. Energy-efficient windows (e.g. double or triple glazed windows)
4. Thermal insulation of walls/roof/floor
5. Thermostats
6. Solar panels for electricity
7. Solar water heating
8. Battery storage
9. Heat pumps (ambient ground and air temperature is used to provide heating/cooling via a compressor)
89. Other

Columns
1. Yes
2. No

C46. *Why not EET*

Why haven't you installed the following items?

Rows: (randomised)
1. Highly energy-efficient appliances (e.g. top-rated washing machines, refrigerators)
2. Energy-efficient windows (e.g. double or triple glazed windows)
3. Thermal insulation of walls/roof/floor
4. Thermostats
5. Solar panels for electricity
6. Solar water heating
7. Battery storage
8. Heat pumps (ambient ground and air temperature is used to provide heating/cooling via a compressor)

Columns
1. Already equipped/installed more than 10 years ago
2. I am planning to install this in the next two/three years
3. I am interested but cannot afford it
4. Not possible (not feasible in my house/apartment area and/or my landlord would need to install this)
5. I am not interested
6. I am not aware of this or don´t know if it is possible to install in my area/home

C47. *Drivers for reduction in energy Consumption*

How important would the following factors be in encouraging you to reduce your energy consumption?

Rows: (randomised)
1. More practical information on how to reduce energy consumption at home
2. Higher energy prices
3. Better performance of energy efficient appliances (e.g. washing machines, dishwashers)

7. Reduced cost of energy-efficient devices and renovation (e.g. financial support)

Columns
1. Not at all important
2. Not important
3. Indifferent
4. Important
5. Very important
888888. Don´t know

C49. *Policy measures to encourage adoption*

To what extent do you support the following potential policy measures?

Rows (randomised):
1. Providing subsidies to individuals for housing renovation, purchasing energy-efficient appliances or investment in renewable energy equipment (e.g. rooftop solar panels)
2. Taxing the use of energy or the purchase of highly energy-consuming appliances and other equipment
3. Introducing energy efficiency standards for appliances and buildings that manufacturers have to comply with

Columns:
1. Strongly against
2. Against
3. Indifferent
4. Support
5. Strongly support

C50. *support of low-income HHds for adoption desirable*

Do you think that low-income households should receive government support (e.g. subsidies) to help them pay for energy-efficient equipment?
1. Yes
2. No
3. Don´t know

Questions C51-C54 are country specific. Absolute values change depending on the country as shown in Table 1 below.
